Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Specification

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the term "ATV-type tire" should be described in the specification. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The terms "ATV-type tire" is unclear; the examiner notes the applicant fails to provide a description in the specification of the terms.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3616

5. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Kitao, et al (6,296,163).

Kitao, et al teaches an ATV comprising a frame; only four wheels suspended from the frame, two of which are front wheels and two which are rear wheels, the front wheels defining a front axis and the rear wheels defining a rear axis; a power unit for driving at least one of the wheels disposed on the frame; a straddle-type seat supported by the frame, the seat including a main seat portion for a driver, the main seat portion having a rearward part, a secondary seat portion, rearward of the main seat portion; a rear rack disposed rearwardly of a rearward end of the secondary seat portion; and a steering member comprising handlebars. The secondary seat portion does not interfere with an open storage space provided on top of the rear rack.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 4-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitao, et al (6,296,163) in view of Hendrick, et al (4,300,706).

Kitao teaches the claimed invention except for a back rest. Hendrick teaches a back rest 144 positioned at a rearward end of a seat portion. Based on the teachings of Hendrick, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the secondary seat portion of Kitao to include a back rest to provide comfort for a secondary passenger.

With respect to the rearward end of the secondary seat portion, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have the rearward end of the secondary seat portion longitudinally disposed in front of a back side of the rear rack a specific distance or within a specific range, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art.

With respect to the wheelbase, it would have been an obvious matter of design choice to have the wheelbase a specific size and/or a size within a specific range, since such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art, as well as, discovering the optimum or workable ranges involves only routine skill in the art.
